

Shop System™ Powder Blender Specifications

The Shop System™ powder blender mixes a small portion of fresh powder with material reclaimed from the printer and powder station. The rotating mixing keg uses internal paddles that separate and recombine the bulk powder mass, breaking down any agglomerates and ensuring homogeneity and consistency prior to use in future prints.

PERFORMANCE	Powder capacity	30 kg (66 lb)
PHYSICAL	Dimensions (H x W x D)	800 x 800 x 400 mm (31.0 x 31.0 x 16.0 in)
	Weight (without powder)	75 Kg (165 lb)
ELECTRICAL	Power requirements	230 VAC, 50/60 Hz, 3 A, 0.66 kW
		120 VAC, 50/60 Hz, 6 A, 0.66 kW
